Student Options (online version)

Target Audience:

This one-day course is aimed at enabling those members of staff involved in Options to manage the whole process. It is particularly relevant for staff from schools that operate a system where Option Blocks are created, to some degree, on the basis of students’ subject choices but it is still useful even where students simply make their choices from pre-determined blocks.

Duration: Full Day (9.15am – 3.30pm, including 15 minutes for coffee and registration)

Lunch will be provided and tea/coffee will be available all day

Course Outline:

The Options Online module is designed to enable students to enter their subject choices directly online using a web browser. As well as removing the need for paper lists it also does not require some of the “End of Year” processes to have been completed before embarking on Options. The course is designed to enable delegates to:-

- Create new Options Plans, Definitions and Pathways
- Allocate students to Pathways
- Edit and analyse Student choices
- Create classes and place them into a blocking structure
- Allocate students to classes, modifying the structure as appropriate
- Produce reports
- Transfer the final Plan to SIMS and Nova-T6

Course Requirements:

Ideally, delegates will have an understanding of the relationship of Options to the timetabling process although this is not a requirement.
